Why Blockchain is the future?

Here's few reasons why blockchain is the future.

Immutable- The data in the blockchain cannot be altered. Each block of information such as facts or transaction details proceeds using a cryptographic principle or hash value.

Transparent- Due to decentralized nature all transactions can be transparently viewed by anyone either via a personal node allow us to see transactions occurring there.

Security- Blockchain can do so by enabling confidentiality through a public key infrastructure that protects against malicious attempts to alter data/ and by maintaining the size of a ledger.

Affordability- it can be massively produced transaction cost simply by removing the need of third parties (such as banks and financial institutes). The system itself is able to manage the transaction and keep records securely.

What is CRYPTO CURRENCY?

Cryptocurrency is an internet based medium of exchange which uses cryptographical functions to conduct financial transactions. Cryptocurrencies leverage blockchain technology to gain

IRREVERSIBLE

transactions can't be reversed when done by nobody, not you, not your bank, not the authorities.

PSEUDONYMOUS

neither transactions nor accounts are connected to real world identities.

FAST & GLOBAL

transactions are instantly in the network and confirmed in a couple of minutes.

SECURE

funds are locked in a public key cryptography system. Only owner of private key can send crypto currency.

PERMISSIONLESS

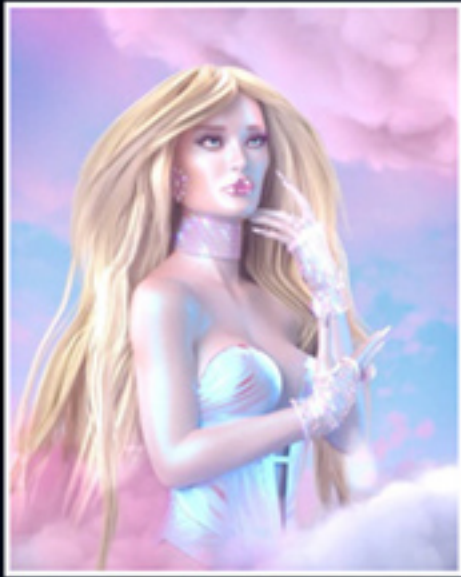

you don't have to ask anybody's permission to use crypto currency it's just a software.

What are NFTS?

NFTs, or non-fungible tokens, are unique on-chain digital assets. Unlike cryptocurrencies like Bitcoin and Ethereum, NFTs are not interchangeable; each NFT is wholly unique.

Asset Tokenization :- Representing Value On-Chain

Verifiability :- Allowing anyone to verify the authenticity of an asset

Transfer & Tradability :- NFTs can be Transferred and Traded in Marketplaces.

Value for the Creator :- NFTs are engine for artist empowerment.

Utility-Driven NFTs:- Where NFTs are Everything!

Advantages of NFTs :- Cannot be Duplicated and Quickly gaining mainstream attention of Different

“In March, Artnet News published a list of the most expensive NFT artworks ever sold, topped by Beeple’s \$69 million sale at Christie’s “.

AR/VR

How AR/VR are Helping to Build Metaverse Ecosystem?

AR/VR game could potentially become part of the metaverse in the future. The key will be to link all the games together to allow users to move from one to the next in a seamless way, and keep the same avatar and accessories if they want to.

BIG Companies including FaceBook (Meta) , Nvidia, Microsoft, RoBlox, investing heavily in building out the VR and AR ecosystem, to set the foundation for metaverse gaming. It also has the social media connections that can help enable connectivity and communication within metaverse games.

GAMING IS THE METHOD A LOT OF PEOPLE WILL USE TO STEP INTO THE METAVERSE FOR THE FIRST TIME.

Web 3.0

What Is Web 3.0 & Why It Matters ?

Web 3.0 enables a future where distributed users and machines are able to interact with data, value and other counterparties via a substrate of peer-to-peer networks without the need for third parties. With Web 3.0, women, men, machines & businesses will be able to trade value, information & work with global counterparties they don't know or yet explicitly trust, without an intermediary.

WEB 3.0

THE MOST IMPORTANT EVOLUTION ENABLED BY WEB3.0 IS THE MINIMISATION OF THE TRUST REQUIRED FOR COORDINATION ON A GLOBAL SCALE.
